Brand Name

Why Mana?

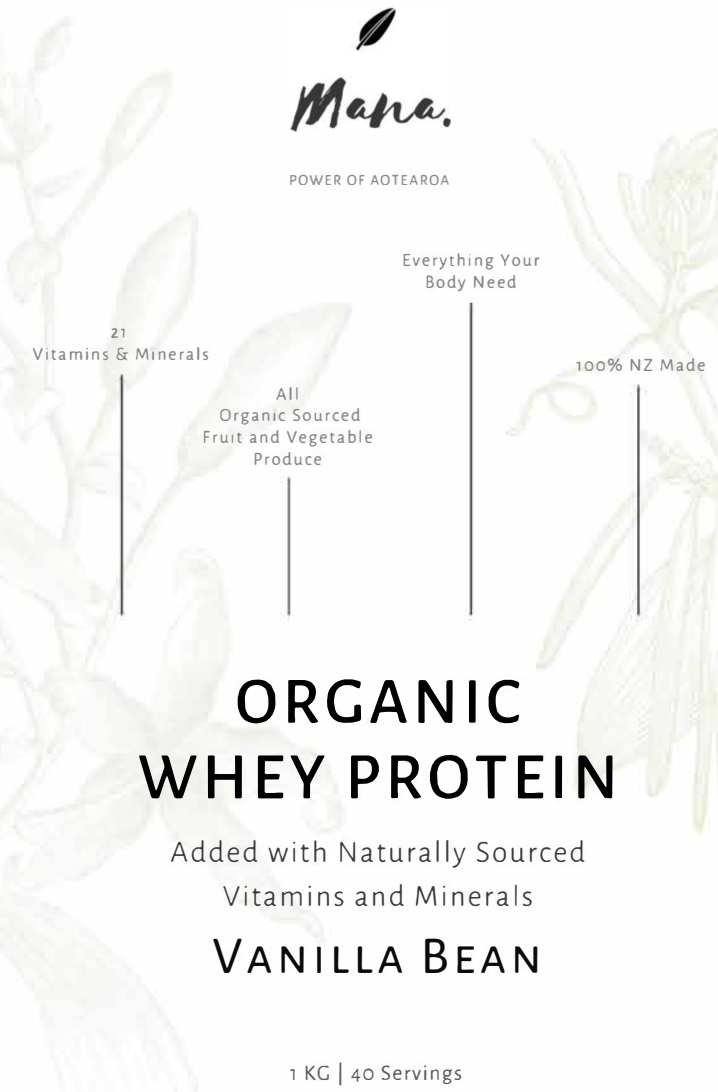
Mana.

POWER OF AOTEAROA

The name Mana is chosen because of it's meaning and it's close bond to Kiwis. Mana means source of both personal and collective strength. Keeping it simple and catchy is key for customer to remember the brand.

The slogan Power of Aotearoa is added to show that Mana is who we are as a person and a nation: Powerful, Prestigious, and Charismatic. All ingredients are crafted with pride from finest New Zealand produce.

Brand Label Design



During my research, designs that attracts most Millenials and Gen Z are designs that shows authenticity, minimalism and value. Both generations factor environmental issues into their purchasing decisions and both hold companies accountable for harming the environment. This is why it's really important to make environmentally friendly product packaging.

This design is inspired by New Zealand nature, with the simplistic design I want to portray a more stripped back and natural feeling of the product. The focus is on product descriptions, with no disruptive illustrations or logos so consumer can understand what the product is in one glance. All the package is recyclable, with paper pouch packaging as an option as well.

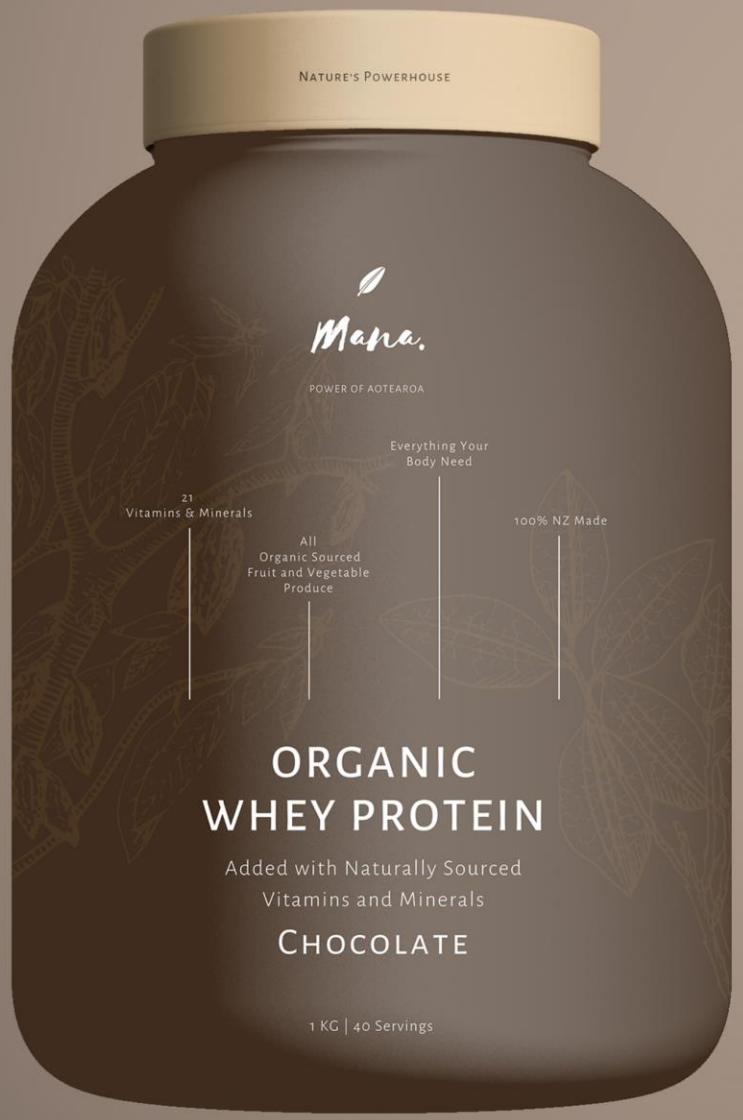
Brand Ideation 1

The brand packaging immediately fulfills the need by making its product descriptions clear and easy to understand. Minimalism is key - complex packaging is difficult to process and requires a higher engagement that hinders purchasing.

Big recyclable container with 1 Kg of organic whey protein powder. 3 Variety of flavors, Vanilla, Blueberry, and Chocolate. NZ Inspired design by combining cleanliness with uncluttered layouts, effective use of white space and symmetry.

Brand Ideation 1

Brand Ideation 1



Brand Ideation 2

Paper pouch container option available with 1 Kg of organic whey protein powder. The paper pouch used for this packaging will be made from “Earthpouch”. It’s an environmentally-friendly stand-up pouch which is plastic-free and can be recycled. The pouch is recyclable as part of the paper stream, and is suitable for re-pulping. There is an option to use natural water-based inks.

Today’s generations globally are choosing eco-friendly products and packaging, consumers are willing to pay more for them. It’s easy to seek out information about a product’s sustainability. Brands that incorporate customers to consume smarter, with less packaging, less waste and more recycling proven to sell more of their products.
